Gutman Library Book Talk - Education Lead(her)ship

GCC 3

An incisive account on the underrepresentation of women, especially women of color, in positions of leadership in K–12 schools and how to correct this bias. Education Lead(her)ship exposes the systemic obstacles that impede the professional advancement of women in K–12 education and offers readers the tools to recognize and combat these inequities. In this rousing work, educational leadership scholars Jennie Weiner and Monica Higgins investigate patterns of gender bias in the profession, prompted by the observation that, although the great majority of classroom educators are women, disproportionately few women inhabit leadership positions such as principal, superintendent, or school administrator.
